Vinayak Rastogi

+91-95823-35033

Product Manager with 0→1 and scale experience across Marketplaces, Platforms and ML systems. IIT Delhi CS

EXPERIENCE

Wishlink - Product Manager

Oct 2024 - Present Gurgaon, India

- **Owning the Creator Revenue and Retention charter, previously owned the Brand-side product** on a three-sided creator commerce marketplace, leading a cross-functional squad of 10, working directly with CXOs and vertical leads to set product vision and roadmap.
- **Founded and led 0→1 of InfluenceOS** - a B2B SaaS suite for D2C brands (launched in partnership with Meta), featuring AI-powered Creator Selection and Campaign Tracking. Scaled the product to 200+ active brands (monthly). Reduced brand onboarding TAT from 2+ weeks to ~few hours.
- InfluenceOS enabled an entirely new revenue line contributing **30% incremental revenue and 20% incremental gross profit,** helping scale paid-collabs charter from **$48K to $400K+/month (~8.5x)**
- Automated order reconciliation and payout workflows for **$40M+ GMV (Monthly),** reducing p50 confirmation TAT by 33%, lifting Creator NPS by 16% and reducing the required ops bandwidth by half.
- Led rapid A/B experimentation for **D2C Revenue growth,** driving **additional 31% creator participation and 19% incremental GMV for D2C brands.** Vibe coded an AI-powered product search and discovery tool, to reduce experimentation TAT and to help creators find relevant brands, achieving **15K+ DAU.**

Wiom - Product Manager (Founding Team)

Jul 2022 - Oct 2024 New Delhi, India

- **Founding product team** member for India's first distributed Internet platform, **scaling to 150K+ active home connections** in 2 years.
- Built **Genie - an ML powered matchmaking engine** for lead-to-partner allocation that **doubled organic conversion (35% → 68%),** cut partner response time from 44 min to 20 sec, and **eliminated ground ops dependency entirely** (~0.87 F1 score, lead location accuracy 70% → 95%).
- Genie **halved CAC (₹1000 → ₹500),** helped triple daily installation rate in 6 months, and enabled optimization of Meta/Google ad campaigns, shifting acquisition from ops-heavy fieldwork to digital channels entirely.
- Redesigned the installation journey with simplified app-based router setup, and AI-based compliance scoring, cutting faults on new installs by 60% and **median install time from 48 → 14 minutes.**
- **Reduced monthly churn by 28.5% and M1 churn by 33%** through revamped acquisition flows, automated at-risk engagement, and a loyalty program (Wiom Gold) + bundled plans.

AB InBev - Cloud Engineer II (Data Engg./MLOps)

Aug 2020 - Jun 2022 Bangalore, India

- Owned infrastructure for a proprietary Market Mix Model platform used to optimize **$2B+ in global ad spend**, serving as the bridge between data science teams and production ML systems.
- Reduced **deployment cycle TAT from 10+ hours to <30 minutes** by developing self-hosted CI/CD GPU pipelines on K8s (AKS), accelerating experiment velocity for data science teams.
- Built the Digital Decoupling platform (Europe), enabling real-time data migration (cdc) across 8+ warehouses with near-zero error rate via event-driven ETL pipelines on Azure's server-less architecture.
- Established **centralized observability** (runtime monitoring, model performance, alerting + logging) via Datadog, Prometheus, Grafana and Loki.

Early career: Data Engineering & ML internships at GfK (London) and Redmart-Lazada (Alibaba)

EDUCATION

Indian Institute of Technology, Delhi B.Tech. in Computer Science and Engineering Jul 2016 - Jun 2020 New Delhi, India

PROJECTS

- **Vibe PM** (github · substack): 3-agent pipeline (Discovery → Scoping → Spec Writer) that helps vibe coders turn rough ideas into structured product requirements, via PM style interviewing and research. Built deterministic orchestrator with model routing, cross-agent argue-back loops, and a 3-layer eval framework. Companion essay on why AI solved execution but not upstream product thinking.
- **Vibe Coding Ecosystem Analysis** (link): Published structured scorecard benchmarking top 3 AI vibecoding tools (Lovable, Emergent, and Replit) across user experience, iteration fidelity, deployment readiness, switching costs, with deep-dives into tool architecture and market dynamics.

SKILLS

Product: 0→1 Strategy, User Research, Growth & Retention, A/B Testing, B2B SaaS, Marketplace, Platform Systems, Multi-Agent Systems.
Tech: Python, SQL, ML/AI, Azure/GCP, CI/CD, ETL pipelines, REST APIs, Kubernetes, Monitoring, LLMs, AI Agents, Eval Frameworks, Context Engineering.
Domains: Creator Economy, Marketplaces, Telecommunications, ML Platforms, Ticketing systems, Payments, Vibe-Coding.
